

UNIFIED PROCESS MENTORS

Course: Customising DOORS with DXL

Length: 2 Days

Course Description:

Unified Process Mentors' Customising DOORS with DXL course provides participants who have some knowledge of programming with the ability to customise the tool by writing simple but effective DXL programs.

The course familiarizes participants with the basics of DXL programming and its practical use to modify DOORS' default appearance and behaviour. Topics covered include types of DXL, accessing and navigating DOORS data, menus and dialog boxes, layout (column) and attribute DXL, graphics, regular expressions, skiplists, and linking.

Each part of the course consists of an explanation of the programming constructs needed to achieve a useful result, and a practical programming exercise on that topic using DXL.

Objectives:

- > Learn how to customise DOORS using DXL
- > Become familiar with the DXL programming language and built-in tools
- > Learn how to add DXL-programmed commands to the DOORS user interface
- > Understand the ways in which DXL can be used

Audience:

This course is intended for anyone who needs to use DXL to adapt DOORS to the needs of their project or their organisation.

Prerequisites:

A basic familiarity with the DOORS user interface (as an ordinary user e.g. editing requirements on a project), some experience with another programming language e.g. Visual Basic, C, Fortran is a great help.

Skills Learned:

- > The skills to customise DOORS by writing DXL scripts.

Our Instructors:

Our instructors all have many years of experience in using and teaching DOORS and DXL. Our partners are founding members of the IBM's World Wide Methods advisory board.

Prices for the course and available dates can be provided upon request. To find out more, visit us at www.UPMentors.com/education or contact:
