

Course: Rational Unified Process Certification ‘Boot Camp’

Length: 2 Days

Course Description:

This RUP Certification Boot Camp introduces the essential parts of the methodology necessary to prepare for the certification test. It includes the most important aspects of Business-Driven iterative development as well as foundational components of the process such as roles, tasks, work products and guidance. The course familiarizes the attendees with RUP’s disciplines, phases, milestones and how they are interrelated. Key concepts are described and discussed with attendees to provide guidance on how the varying levels of planning and project decisions will need to be made. Instructors cover various scenarios to illustrate real life examples.

As part of each module, a set of sample questions will be provided, reviewed and discussed by the class participants.

Objectives:

- > Learn Key Aspects of Iterative Development Principles
- > Describe How to Plan and Select Iterative Development Work Products
- > Understand Basic Method Elements and their Relationships
- > Cover Basic Content of RUP Disciplines

Audience:

This course is intended for anyone interested in preparing for the IBM Rational Unified Process certification exam.

Our Instructors:

Our instructors are all RUP certified and have years of practical hands-on experience. Our partners are founding members of the IBM’s World Wide Methods advisory board.

Prices for the course and available dates can be provided upon request.
